I respectfully urge the FCC to reject the NAB's petition 04-160 and support XM's ability to provide the kind of programming that is needed and deserved. XM Radio's traffic and weather channels provide a very valuable service to those of us who make our living traveling the highways of the US. There is NO OTHER service available anywhere to provide this information. Local radio channels ONLY provide this service at specific times (unknown to anyone other than local listeners). Also, local channels are not strong enough to pickup on AM or FM until too late to make changes in routing. I pay for this service and the National Association of Broadcasters should not be allowed to dictate what XM radio is allowed to broadcast or that I am permitted to hear. Thank you, in advance, for allowing XM Radio to continue with the programming that it's subscribers demand and deserve.
